Zinny product requirements.

Zinny is an education platform sold to institutes and universities. Each one gets its own private space to run courses, batches, tests and students. This document is what the IT team builds from.

Simple to run

An admin finds anything in one or two clicks, grouped by what they manage.

Built like a real institute

Roles follow how a university already works: administration, teaching, students.

Flexible for students

Students pick the batch that fits their schedule when they enrol.

Contents

1	Users and roles	Page 2
2	Who sees what	Page 3
3	Admin panel menu	Page 4
4	Courses, batches and enrolment	Page 5

Users and roles

Three layers of users, 19 roles in total. The institute admin panel covers the middle layer.

Zinny team

Separate super-admin panel

Super Admin · Account Manager · Content QA · Finance Admin · Partnerships · Support Agent

> Creates, licenses and supports each university

University

The institute admin panel

Administration

- Board / Owner
- Institute Admin
- Accounts & Fees optional

Teaching

- Head of Department
- Permanent Faculty
- Visiting Faculty

Students

- Current Student
- Alumni
- Parent / Guardian optional

Head of Department creates courses and the batches inside them, and assigns faculty to each batch. **Students** choose a batch when they enrol.

> Students buy courses; universities can sell their own

Marketplace

Later phase

Independent Instructor · Sponsor / Advertiser · Corporate Partner · Individual Learner

Role + scope. Save every assignment as user, role and scope (platform, university, department, batch). One person can head one department and teach in another.

Who sees what

Each university role sees only its part of the admin menu. Students, alumni and parents use the learner app, not the admin panel.

Full create, edit, delete View read only Own dept, own batches: limited to their scope

Institute Admin
Runs the university's space: departments, programs, users and branding. Bulk uploads students by CSV.

Board / Owner
Read-only view of enrolment, completion, revenue and faculty load.

Head of Department
Creates the department's courses and batches, sets timings and seats, assigns faculty, approves batch switches.

Permanent Faculty
Teaches assigned batches: content, tests, grades and attendance.

Visiting Faculty
Same as permanent faculty, with an end date on access.

Accounts & Fees
Fee collection, receipts, invoices and finance reports.

Admin panel menu

Ten sections, grouped by what an admin manages. Tracks is removed; everything else from today's panel has a place.

Products

Everything you sell and teach

- **Courses** with bundles, batches, polls, certificates
- **Tests** with question pool, quizzes, proctoring

Courses, batches and enrolment

The Head of Department sets up each course and its batches. Students choose the batch that fits their schedule when they enrol.

1

HOD creates the course

Inside their own department, with its curriculum, price and certificate.

2

HOD adds batches

Each batch has its own days and timings, start date, seat limit and faculty.

3

Student picks a batch

When enrolling, the student sees every open batch and chooses the one that suits them.

Switching batch: after enrolling, a student can ask to move to another batch of the same course. It goes to the HOD for approval and only works if that batch has a free seat.

What the student sees

Example course with three batches

Weekday morning
Mon to Fri, 9 to 11 am
Starts 2 November
12 seats left

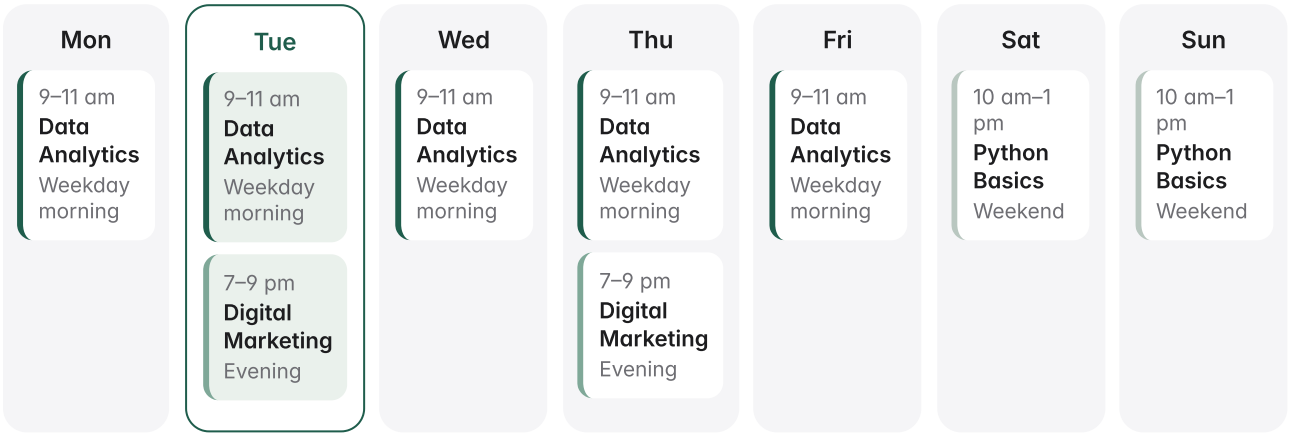

Weekday evening
Mon to Fri, 7 to 9 pm
Starts 2 November
5 seats left

Weekend
Sat and Sun, 10 am to 1 pm
Starts 7 November
Full

Who can create	Only the Head of Department (and the Institute Admin) can create courses and batches, and only in their own department.
Faculty	Faculty are assigned to batches, not whole courses. They teach, test and grade only the students in their batches.
Each batch	Needs a name, days and timings, start and end date, seat limit and at least one faculty member. A full batch can't be picked. Live classes, attendance and the timetable follow the batch the student picked.

Student timetable

Every student gets a timetable built automatically from the courses and batches they picked. Nobody has to make it by hand.

How it is built

- Made from the days and timings of every batch the student is enrolled in.
- Each session shows the course, time, batch and faculty, with a join button for live classes.

Clash check

- When picking a batch, the student is warned if its timings overlap a batch they already have, before they enrol.

Always up to date

- Updates instantly when the student switches batch or the HOD changes a batch's timings. The student gets a notification.

Views

- Today's classes on the learner home screen, plus day and week views.

Feature requirements

What each part of the panel must do in the first release.

Courses

Products

- HOD creates a course in their department: title, description, curriculum, price, certificate.
- Inside a course: tabs for Curriculum, Batches, Assignments, Live classes, Certificates, Settings.
- Bundles group several courses at one price. Polls can be added to a course.
- Certificates are issued on completion, with templates and renewal rules.

Batches

Inside each course

- HOD adds any number of batches per course: name, days, timings, start and end date, seat limit, faculty.
- Seats count down as students enrol; a full batch is shown but can't be picked.
- Students can request to switch batch; HOD approves if the new batch has a free seat.

Tests

Products

- One list for mock tests and test series, with a type filter.
- Every question lives in one Question pool and is pulled into tests and quizzes.
- Inside a test: Questions, Proctoring, Settings, Results.

Users

- Administration, Teaching and Students lists, matching the roles on page 2.
- Departments, each showing its HOD, faculty and courses.
- Bulk import of students and staff by CSV.
- Convert a student to alumni on graduation: keeps certificates, loses program courses.
- Link a parent to a student for a read-only view.

Feature requirements, continued

User Leaderboards

- XP rules decide what earns points, such as finishing a lesson or passing a test.
- Badges for milestones and time-bound challenges.
- Leaderboard ranked by batch or by course.

Finance

Sales and reports

- Sales: orders, payments, subscriptions, wallets, referrals, affiliates, GST invoices.
- Reports: one page. Choose a report type and date range, then view or download.
- Report types include enrolments, transactions, course and batch progress, test scores and live class attendance.

Website

- Manage profile: institute profile, my profile page and the website builder.
- Website sections: testimonials, reviews, enquiries, gallery, videos, blogs, team.

Learner app

Students, alumni, parents

- Browse courses, enrol, pick a batch, pay.
- See their own timetable (page 6), join live classes, submit assignments, take tests.
- View grades, certificates, XP and leaderboard.

Unchanged

- Dashboard, Marketing, Community, Insights and Settings stay as they are. Contacts move to Marketing; Legal documents move to Settings.

Platform rules

Rules that apply everywhere, not to one screen.

Separate spaces	• Each university's data is fully separate. No user can see another university's data. • Each university has its own branding and website.
Permissions	• Every action checks the user's role and scope on the server, not just by hiding menu items. • Roles can be added later without changing existing permissions.
Zinny team access	• The Zinny team only enters a university's space through support mode. • Every support-mode action is logged with who, what and when.
Devices	• Admin panel works on desktop and tablet. • Learner app works on mobile first.
Money	• Every payment is tagged with the course, batch and university it belongs to. • GST invoices are generated for every paid order.

Build phases

Build what the first university needs first, then grow.

1

Pilot

Run real classes at one university.

- Institute Admin
- HOD, courses and batches
- Permanent and visiting faculty
- Students, enrolment, batch choice, timetable
- Tests and question pool
- Payments

2

Full university

Ready for multi-department universities.

- Board / Owner view
- Departments at scale
- Alumni and parents
- User Leaderboards
- Finance reports page
- Website builder

3

Marketplace

Sell courses across universities.

- Independent instructors
- Individual learners
- Sponsors and corporate partners
- Cross-selling courses
- Annual membership
- Commission on sales

The Zinny team panel (Super Admin, Account Manager and others) is built alongside phase 1, starting with Super Admin and Support Agent.
